DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lotz et al in view of Grant.

Lotz et al disclose an airfoil comprising a leading airfoil element with upper and lower surfaces, a trailing airfoil with upper and lower surfaces, and a slot defined by the airfoil during a transonic condition of the airfoil where the slot allows a portion of the air flowing along the lower surface of the leading airfoil element to split and flow over the upper surface of the trailing airfoil element. See especially Figure 1b and column 5, lines 25-35. Lotz et al fail to specify that the airfoil is "swept" or that the slot is "full-span". Grant teaches, see especially Figure 1, that it is well known in an aircraft to have both swept wings and a full-span slot. Motivation to combine is the specification of a particular, i.e. swept, wing for an unspecified type, with the attendant advantages of great efficiency at high speeds. Likewise, the full-span slot and trailing airfoil allows greater control due to larger reacting areas of the airfoil. To employ the teachings of Grant on the airfoil of Lotz et al and have a swept wing with a full-span slot is considered to have been obvious to one having ordinary skill in the art.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Art Unit: 3644

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-30 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-61 of copending Application No. 10/678,474. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim the same airfoil elements in slightly different language.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Steidl, Zimmer, and Hendrickson are cited as being of interest since they disclose slotted airfoils.
